## SUMMARY

In 2012, the Lemont Park District partnered with the Solutions Resource Center at the University of St. Francis to complete a community needs assessment project as a component of an overall strategic plan. Community focus groups were held on: Monday, January 28 and Wednesday, January 30, 2013. Survey data was collected between March 1, 2013 and March 22, 2013. Survey analysis was completed in April 2013.

#### Highlights of the data include:

- Nearly all respondents (95%) felt the park district was a valuable asset to the community. When asked why, the most common responses were: Programming; Facilities and programs offered; Convenience; Brings community together; Adds value to our community; Facilities and programs; Location.
- The top four visited parks were:
  - Centennial, Covington North, Covington Knolls and Bambrick.
- The top three visited facilities were:
  - CORE indoor track, CORE programs/classes, CORE indoor pool.
- Respondents prefer to receive communication via:
  - E-mail, direct mail and the brochure.
- Most respondents prefer to register online.
- In general, respondents are satisfied with the park district and feel the parks and fields are in good condition.
- The preschool was rated as excellent (from those who listed an opinion).
- The 4<sup>th</sup> of July fireworks display was rated as excellent (from those who listed an opinion).
- The top three new facilities listed as higher priority were:
  - Biking paths/trails
  - Paths/trails that connect to one another
  - Walking paths/trails
- The top three programs listed as higher priority were:
  - Health/fitness programs
  - Community wide events
  - Environmental/nature programs
- A large majority (72%) of respondents are in favor of renting Lemont fields to outside groups (fee-based).
- A large majority (77%) were not aware of the Lemont Park Foundation and the Helping Hands Award program.
- The vast majority of respondents visit the downtown Lemont area at least once a month.
- The top reasons why respondents do not participate in recreation programs and services are: Lack of programs I'm interested in; I don't have time; Fees are too high for me.

The following report outlines the data analysis of significant factors and cross-tabulations of key correlations.

## **METHODOLOGY**

#### **Community Needs Assessment Description:**

The Lemont Park District community needs assessment project included qualitative data gathered through public focus groups and quantitative data gathered through survey research.

Focus groups are non-experimental research methods that describe the characteristics of existing opinions. In this project, the focus group method sought to identify the attributes, factors and characteristics that are important to Lemont Park District residents, the ways these factors interact and how they relate to the future of the organization. This information was used to design survey questions.

Surveys are quantitative research. A survey seeks to gather people's opinions by measuring their responses to a set of questions. A quantitative survey draws a random sample from a population and uses those findings to demonstrate the views of the population as a whole.

#### **Participants Sample Selection:**

The population for focus group selection was identified as any individual residing in the Lemont, IL Park District boundaries. Full time employees and board members of the park district were excluded from the sample selection. A community wide invitation to attend focus groups was publicized to the Lemont Park District area community.

The population for survey research was defined as 4,000 randomly selected households within the Lemont Park District boundaries. The 4,000 identified population received a survey via direct mail. Each survey included an identifier to ensure it met the random sample selection. All residents were encouraged to respond to the survey through a series of public relations press announcements and hard copy surveys were made available at the front desk of The CORE and Centennial Building.

#### **Data Collection:**

Data was collected in two primary mediums.

Qualitative data was collected on Monday, January 28 and Wednesday, January 30, 2013 via community focus groups.

Quantitative data was collected via direct mail survey research between March 1, 2013 and March 22, 2013.

#### **Focus Group Instrument:**

The focus group instrument was developed by Dr. Lyle Hicks, USF facilitator. The instrument was a four-part agenda designed to generate discussion including a worksheet for individual input, a SWOT (Strengths, Weaknesses, Opportunities, Threats) analysis, Priorities discussion and general comments.

#### **Survey Instrument:**

A survey instrument was developed incorporating input from the Lemont Park District. The 2013 survey instrument was approved on February 19, 2013 by Ms. Carrie Dellamano, Sales and Marketing Director, Lemont Park District.

#### **Measurement Scales:**

Survey data was inputted into a web instrument and downloaded into SPSS software for analysis. Respondents completing the survey online were asked to enter their identifier code as a point of validity. All codes received were cross-referenced with the random sample codes.

In addition to standard numeric analysis of each question, cross tabulations were also conducted.

## **RESULTS - RESPONSE RATE**

#### **Response Rate:**

A total of 901 number completed surveys were received by the Solutions Resource Center.

A total of 799 surveys were considered in the statistical representation of data as these were received from verified households within the random sample.

The response rate for the statistical representation of data was: 20% of the identified sample.

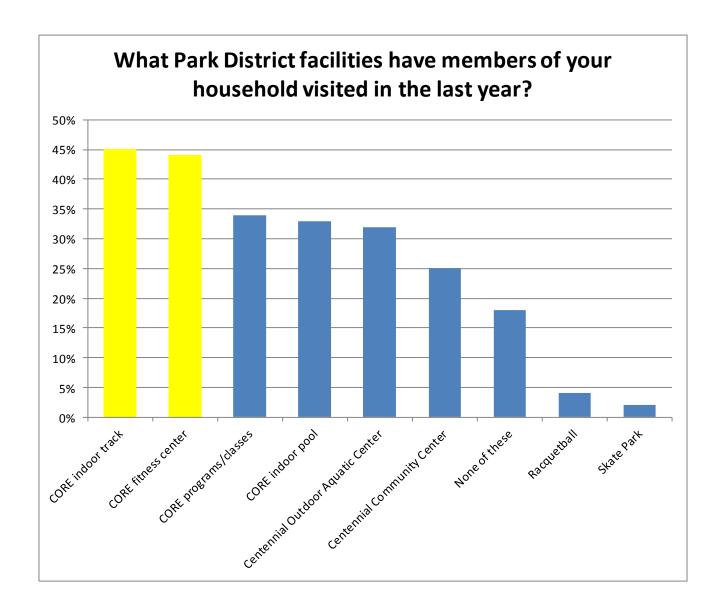

Based on a population of 16,000 Lemont park district residents and a random sample of 799 valid responses, the overall confidence interval and error margin for the survey are: 95% +/- 3.

# **DATA RESULTS**

Which Park District facilities have members of your household visited in the past year?\*

| CORE programs/classes                            | 34%              |
|--|------------------|
| CORE indoor pool                                 | 33%              |
| CORE indoor track                                | <mark>45%</mark> |
| Racquetball                                      | 4%               |
| Skate Park                                       | 2%               |
| CORE fitness center                              | <mark>44%</mark> |
| Centennial Community Center                      | 25%              |
| Centennial Outdoor Aquatic Center (Outdoor Pool) | 32%              |
| None of these                                    | 18%              |

# **RESULTS – CROSS TABULATIONS**

Data was cross tabulated by various demographic categories. The following line items indicate correlations or themes in the cross tabulation data.

#### Parks

- Respondents with children are more likely to visit Bambrick Park than those with no children.
- Those with a higher income are more likely to visit Bambrick Park.
- Those who are aged 40-49 are more likely to visit Bambrick Park.
- Respondents who have lived in Lemont for 0-5 years are more likely to list "building new tot lots/playgrounds" as a higher priority.
- Respondents with children are more likely to feel improvements need to be made to the parks or fields.

#### The CORE

- Those who have lived in Lemont for 6-10 years are more likely to use CORE facilities than those who have lived in Lemont less than 6 years or more than 10 years.
- Those with children are more likely to use the CORE's programs/classes, indoor pool and fitness center.
- Those aged 18-39 are most likely to be a member of the CORE.

#### Centennial Outdoor Aquatic Center (Outdoor Pool)

- Respondents with children are more likely to use the outdoor pool than those without children.
- Respondents between the ages of 18-49 are more likely to use the outdoor pool.

#### Satisfaction

- Respondents with children are more likely to be satisfied with the park district versus those with no children.
- Respondents who have lived in Lemont for more than 10 years are more likely to be less satisfied than those who are newer to the community.

#### Days and Times

- The best days are times, when cross tabulated are:
  - o 9am-11am Monday, Tuesday, Wednesday, Thursday, Friday
  - o 5pm-7pm, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday
  - After 7pm Saturday
