

May 19, 2021

Dear Lemont Park District Community,

It has been announced by both the Center for Disease Control (CDC) and Governor Pritzker, that mask-wearing guidance has eased for fully vaccinated people in the State of Illinois. Those fully vaccinated are not required to wear masks or social distance in most indoor and outdoor settings. The new guidance still requires masks in crowded indoor settings such as buses, planes, hospitals, etc. Here is a summary of how the updated mask guidelines affects Lemont Park District operations:

- Members, guests and employees whom are fully vaccinated may enter District facilities and participate in District activities without wearing a face covering. Proof of vaccination is not required or monitored, but we ask for everyone's cooperation with this revised policy.
- Members, guests and employees whom are NOT fully vaccinated should continue to wear masks indoors for your own protection and the protection of others who have not been vaccinated. Again, proof of vaccination is not required but we ask for everyone's cooperation.
- Children aged 3-12 years old, are still required to wear masks indoors and outdoors unless social distanced. Instructors, coaches and staff, directly overseeing and working with Children 3-12 years old, should still wear masks whether vaccinated or not, when with the participants unless outdoors and social distanced.

We thank you for your continued cooperation as the State of Illinois moves closer to Phase 5 of the Restore Illinois plan. Details of the Restore Illinois plan can be found on the Illinois Department of Public Health (IDPH) website at dph.illinois.gov.

Sincerely,

The Lemont Park District Staff
